-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3764

Claims 13-17 are allowed.

Claims 6-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Naegele.

Naegele discloses a device comprising: a body adapted to receive punches and kicks delivered by a user, said body having a hitting surface a sound generator (168) switches (fig. 6), said switches having first and second states (fig. 6a and 6b).

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Luedke et al.

In regard to claims 1-2 note the sound generator (located within element 24), (note col. 5, line 24) and switch (80) for adjusting threshold levels. In regard to claim 3 and as broadly claimed element (6) is a housing, which contains many elements including a switch.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Luedke et al.

Art Unit: 3764

In regard to claim 4, the examiner notes that it is well known in electronics to connect components of an electronic device together through usage of wires.

In regard to claim 5, element 80 of Luedke et al may be considered as an adjustment plate which is mounted in said housing and wherein it would have been obvious to attach said adjustment means/plate through a wire to other components of said device. The examiner further notes that dials are known to include plates.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the overall device of Wooster et al, Cook, French and Klapman.

Any inquiry concerning this communication should be directed to Jerome Donnelly at telephone number (571) 272-4975.
